## Welcome Message from EAP Director

Dear Participants,

This is my great pleasure to greet with you at this opportunity of NACE EAP Area Conference 2017 and India CORCON 2017 in Mumbai as my very first task of new EAP Area Director since I was elected as Director in March this year.

NACE International is Corrosion Engineers Society which has long history since established in 1943 in the United States of America, and now is leading the world for Corrosion Prevention by creating valuable standards and education systems.

Especially in this area of the world, the number of Association members are rapidly growing and activities are getting more and more popular. Among Five International Areas outside of America, about 1/3 of total members, i.e. 5,600 over are registered in this East Asia and Pacific Area. If you are the member or not, I am still confident that by attending this event, you are finding and absorbing some new knowledges and even the solutions.

Please participate the discussion and extend your communication network.

Enjoy the atmosphere of the friendly welcome of NACE spirits.

At the end of my greeting, I would like to express my most sincere appreciation to our Partners and Sponsors who support this event.

Toyoji Takeuchi,  
Director, NACE East Asia and Pacific Area 2017-2020
